MAHARAJA INSTITUTE OF TECHNOLOGY MYSORE

VISION:

"To be recognized as a premier technical and management institution promoting extensive education fostering research, innovation and entrepreneurial attitude."

MISSION:

- To empower students with indispensable knowledge through dedicated teaching and collaborative learning.
- To advance extensive research in science, engineering and management disciplines.
- To facilitate entrepreneurial skills through effective institute-industry collaboration and interaction with alumni.
- To instill the need to uphold ethics in every aspect.
- To mould holistic individuals capable of contributing to the advancement of the society

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING VISION:

"To be a leading academic department offering computer science and engineering education, fulfilling industrial and societal needs effectively"

MISSION:

- To enrich the technical knowledge of students in diversified areas of Computer Science and Engineering by adopting outcome-based approaches.
- To empower students to be competent professionals maintaining ethicality.
- To facilitate the development of academia-industry collaboration.
- To create awareness of entrepreneurship opportunities

Talk on Computer Graphics by Dr. Jay Veeraswamy

ನಗರದ ಮಹಾರಾಜ ತಾಂತ್ರಿಕ ಮಹಾವಿದ್ಯಾಲಯದ ಗಣಕ ವಿಜ್ಞಾನ ವಿಭಾಗದಲ್ಲಿ ನಡೆದ ಕಾರ್ಯಾಗಾರದಲ್ಲಿ ಅಮೆರಿಕಾದ ಡಲ್ಲಾಸ್ ಟೆಕ್ಕಾಸ್ ವಿವಿ ಗಣಕಯಂತ್ರ ವಿಭಾಗದ ನಿರ್ದೇಶಕ ಡಾ.ಜಯ್ ವೀರಸ್ವಾಮಿ ಅವರನ್ನು ಸನ್ಮಾನಿಸಲಾಯಿತು. ಸಂಸ್ಥೆ ಪ್ರಾಂಶುಪಾಲ ಡಾ.ಬಿ.ಜಿ.ನರೇಶ್ ಕುಮಾರ್, ಎಂಐಟಿಟಿ ಪ್ರಾಂಶುಪಾಲ ಡಾ.ವೈ.ಟಿ.ಕೃಷ್ಣೇಗೌಡ, ಮಾಹಿತಿ ತಂತ್ರಜ್ಞಾನ ವಿಭಾಗದ ಮುಖ್ಯಸ್ಥ ಡಾ.ವೈ.ಎಚ್.ಶರತ್ ಇತರರು ಇದ್ದರು.

Amination Awareness Program by MAAC Mysuru

"Animation Course Awareness Program" by MAAC Mysuru, to all the faculties of CSE. Here we got awareness of how animation is done, what are all different animation software available and different courses/packages on animation they provide to our students.

Trainers from Google Cloud are at MIT Mysore for 3 days for the ever Google Cloud Readiness Study Jam from 9am to 4pm for 8th, 6th a 4th semester students. Totally 430 students have enrolled.

Best Actress Award:

Aswathi Balan, an alumni student of 2013 batch, CSE, MIT Mysore, has best awarded been actress for "NENJAM" video song by the "Temple shot committee". Here is the URL: video https://youtu.be/QLXP3 l2Lxf8

Animation Awareness Talk

"Animation Course Awareness Program" by MAAC Mysuru, to the 3rd year students of CSE. They gave awareness on how animation is done, what are all different animation softwares available and different courses/packages on animation they provide to the interested students.

Project Exhibition

The department of Computer Science had conducted a one-day final year project exhibition on 6th March 2020. The final year students were given a stage to demonstrate how their projects work and what domains of computer science did they opt for building their project by using the help of the project models they have built. The main audience was the pre final year students i.e., the sixth semester students, and this was because to gain knowledge and have an idea about how the theoretical aspects of computer science can be brought to practical use.

Art of Public Speaking

The session was by Pavan B Patel, student of 6th sem, on basics of public speaking and motivating the trainees to take initiative in the field of presenting themselves and making them realize that public speaking is the fundamental of all the possible professions. The Target audience were 4th sem students.

MODERN TECHNOLOGY HAS MADE MAN A SLAVE

With more than three billion out of the total 7.7 billion people in the world owning a piece of 'SMART' technology. By 2020, almost everyone from young to elderly, is predicted to be in possession of at least a smartphone, and it is no surprise that man has probably leaned on his inventions more than he has bargained for. The irony today is that as our technology is turning out to be more 'SMART', we are turning out to be quite the contrary. From centuries, Mankind has always been attracted to shiry, or luminous objects, whether it is day light, or the stars at night, or sparkling diamonds and rubies. But we must realize that as Anglerfish emit light to catch their prey, devices are also enslaving us with their LCD and LED displays.

Albert Einstein once quoted,"It has been appallingly obvious that soon our technology will exceed humanity", and we have kept true to his words. We have created a society today where Google triumphs Knowledge, and a society where our activities are defined by the number of likes on Pacebook and Instagram, or the number of retweets on Twitter and where pictures have been edited to such an extent such that we can burely recognize that person in real life. Our sources of entertainment have reduced to watching videos on YouTube, or a series of 'Game of Thrones'. Why have we reached such a pathetic state of depletion?

People in the olden days may have been less equippted and intelligent, but were certainly more whole and wise. Technology has made us to forget how we were

complete. We are slowly loosing qualities such as as austhetics, empathy sympathy, and worst of all inagination. Our technology is making as turn more artificial, as they become more human-like. Machines can do the work of 50 ordinary men, but one extra ordinary man can do more work than 50 machines. But the world is running fast out of these men in other fields as many extra ordinary men are focusing on improving technologies. As the famous author Jorge Luis Borges said in one of his interviews, "I believe that books will never disappear as, as instruments such swords are extension of our arms, and telescope of our cycsight, books can never be replaced as they are the extension of our imagination." But in today's world, hooks toe are disappearing as our imagination is being ourbed by movies and videos.

Holy scriptures, forged by our forefathers, may it be of any religion , all state a sentence, which more or less translate into the same thing say "If one wants to attain absolute supremacy, or pinnacle of success, then he or she must command his mind and devoid it of all materialistic objects." We human beings, who naturally like to oppose,have been effective in ignore and violating those words. Technology has become the shackles for humanity's dream of flight. Today, it has reached such a situation that when a new piece of technology rolls in ,if you aren't part of the road roller,then you automatically become the road It is killing us like slow poison. Educational fields have seen an overall decline in the grade rate ,the simple fact being that parents do not mind their children from choosing YouTube over knowledge,or 'Games of Thrones' over homework and studies. There has also been an increased amount of threats as people videotape their fellow humans die or get injured, rather than helping them. Almost every viral video is one such example of such gruesome incidents. The production quality has declined as people have less knowledge on the mechanism and working of their assigned units. Nuclear families are becoming more isolated with the itroduction of Skype and Facetime. The number of divorces has increased as dating apps are just the perfect creation for short term relationships.

Finally it is the wielder of the knife who can either use to save lives like a doctor of take lives like a morderer. Fedmology has the power to evolve us or devolve us, and we must use it to build wings, not create chains and imprison ourselves, for technology is not our masters at their we are in-charge. Finally, in this world where animals are turning out to be more humane than humans, see handings ean never decide the difference between the right or the wrong, paint like a human, sing like a human, or even dance like one. That's why they are called as Artificial Intelligence, and not Artificial Humans.
