

Stack Forge — Event Timeline Overview

1 Club Inauguration — “The Genesis of Stack Forge”

Date: 6th January 2025

Overview:

The official launch of Stack Forge, the Department of CSE’s innovation and coding club at MIT Mysore.

The inauguration marked the start of a new era where creativity, collaboration, and coding excellence converge.

2 Faculty Development Program (FDP) — “Hands-on IoT”

Dates: 20th to 25th February 2025

Collaboration: Rutronix

Overview:

A one-week FDP focusing on practical exposure to Internet of Things (IoT).

The sessions bridged the gap between theory and real-world IoT applications through live demos and sensor-based experiments, empowering both faculty and students.

3 Java Bootcamp — “Code. Compile. Conquer.”

Dates: 17th to 21st March 2025

Collaboration: Geekwick

Overview:

A five-day bootcamp designed to strengthen Java fundamentals and object-oriented concepts.

The program included mock interview sessions to simulate real placement scenarios, giving participants a hands-on learning and confidence-building experience.

Participation: 150+ active learners.

C Bootcamp — “Back to the Basics of Logic”

Dates: 9th to 10th May 2025

Collaboration: Geekwick

Overview:

A concise two-day workshop aimed at first-year students, focused on sharpening their logical thinking and problem-solving using C language.

It laid the foundation for future participation in coding events and hackathons.

5 Hackverse — “A 24-Hour Odyssey of AI and Full-Stack Innovation”

Dates: 16th & 17th May 2025

Collaboration: ATOM

Overview:

Stack Forge’s marquee event — a 24-hour hackathon centered on AI and Full-Stack development.

Participants tackled real-world problems with innovative, scalable, and sustainable tech solutions.

Hackverse stood as a defining milestone for Stack Forge, showcasing creativity, teamwork, and technical prowess at its peak.

6 Quiz Sessions — “Battle of Brains” (Weekly Series)

Frequency: Every Saturday

Overview:

A continuing weekly initiative by Stack Forge to engage students in interactive quizzes on programming, data structures, algorithms, and emerging technologies.

These sessions sustain the club’s learning spirit and serve as quick, fun knowledge boosters.

7 EscapeX — “The Stack Forge Doomsday”

Date: 30th September 2025

Theme: AI Has Taken Over — Humanity’s Last Stand

Overview:

A cinematic, story-driven escape room challenge where participants faced AI-controlled puzzles, coding enigmas, and logic tests under intense time pressure.

The event tested wit, teamwork, and problem-solving in an electrifying end-of-season showdown.

EscapeX concluded Stack Forge’s first year of events with style and spectacle.
